

Luxing Mission Statement:

This project is very important to our community here, in Van Nuys. It's not your normal submittal in that this project is actually serving the community in which it is located. This facility is attending those in our community who are not as fortunate as we are; those who are physically and/or emotionally restricted from enjoying the simplest of tasks in daily activities. (ie.: a simple walk in the park, or frequent a restaurant, or even simply taking a shower) They are in need us; their friends and neighbors; compassionate and caring people who want to provide a "home" for them.

These few who are less fortunate than we are, have either been in and automobile or industrial accident and are in need of continuous care 24/7. That is what this facility will provide for them by caring staff members who desire for these residents to each experience just a small piece of what you and I enjoy each day and do it in a home setting.

The Luxing Congregate Living Health Facility is just that, a "single-family residence", as defined by the State of California Health and safety Code (HSC). We are filling a void in our community by replacing the outdated and unhealthy environment where these kinds of patients typically are found; such as hospitals, acute care facilities, or skilled nursing facilities and extending their lives in a 'home environment' and improving their health both physically and emotionally. They will experience a home cooked meal, enjoy activities with others, relax and read a book in the comforts of their "own home", or play video games with their fellow residents, rather than be placed in an institution where some of these tasks are not even possible. While enjoying these things they have the security of knowing they are attended to by a caring staff 24 hours a day and can call this place "home".

We should all, with the approval of this project, feel a warm sense of accomplishment, for we are all contributing to filling this dire need and give a group of people less fortunate than ourselves, a home for today and hope for tomorrow.
