50th & 85th Percentile speeds

The speeds at which 50% and 85% of the vehicles respectively traveling past the location do not exceed.

Pace Speed range

The 10 MPH range of speed at which the majority of cars are traveling at the location.

Inside Threshold

How is sign effectiveness calculated?

As the sign displays vehicle speeds, we compare the initial speed of each vehicle detected against the final speed of the vehicle before it passes by the sign. If the vehicle speed has increased or stayed the same, we place that vehicle in the "other" category, and if a vehicle does slow down, it's added to the "vehicle slowed/sign effectiveness" percentage.

Violation Threshold

Since many of our customers don't pull vehicles over for driving within a reasonable threshold above the speed limit, we call this group of moderate speeders "low risk" vehicles because they are inside the threshold. Once set, the violation threshold calculates violation numbers based on speeds above that threshold and excludes low-risk vehicles from the calculation.

ALL TRAFFIC SOLUTIONS

Extended Speed Summary Report

Generated by CJ Tinsley from All Traffic Solutions Software Developer Account on May 23, 2018 at 12:16:53 PM

Time of Day: 0:00 to 23:59
